

SERIES UWS

EXPERIENCE:

- Ullrich Aluminium has over 20 years experience in Design/Extrusion/Distribution of aluminium in Australia, New Zealand and the Pacific Islands. We pride ourselves on our excellent designs, technical advice and after sales service.

DESIGN:

- The Ullrich Aluminium Roof Walkway has been designed to meet the requirements of Australian Standards AS1657 - 1992 and various codes of practice for safe work on roofs.
- The dual direction grip of the series 13 and 22 makes it ideal for pedestrian access over any metal deck roofs.
- Our roof walkway system can be installed without handrails or a handrail system to one or both sides.

FEATURES:

- Lightweight - weighs 7kgs/lm (without handrails)
- Simply installed to all metal deck roof sheeting
- Easy to follow installation data
- High resistance to slip
- Maintenance free - non-corrosive aluminium
- Can traverse roof in any direction
- Handrails easily fitted to one or both sides
- Taper supports available to level walking surface if required
- Can be installed on fibre cement roofing
- Technical support available upon request
- Readily available through our network of branches

USES:

- Safe pedestrian access to plant or equipment on roofs
- Small roof A/C or fan platforms
- Access stairways and landings
- Step overs and ladders

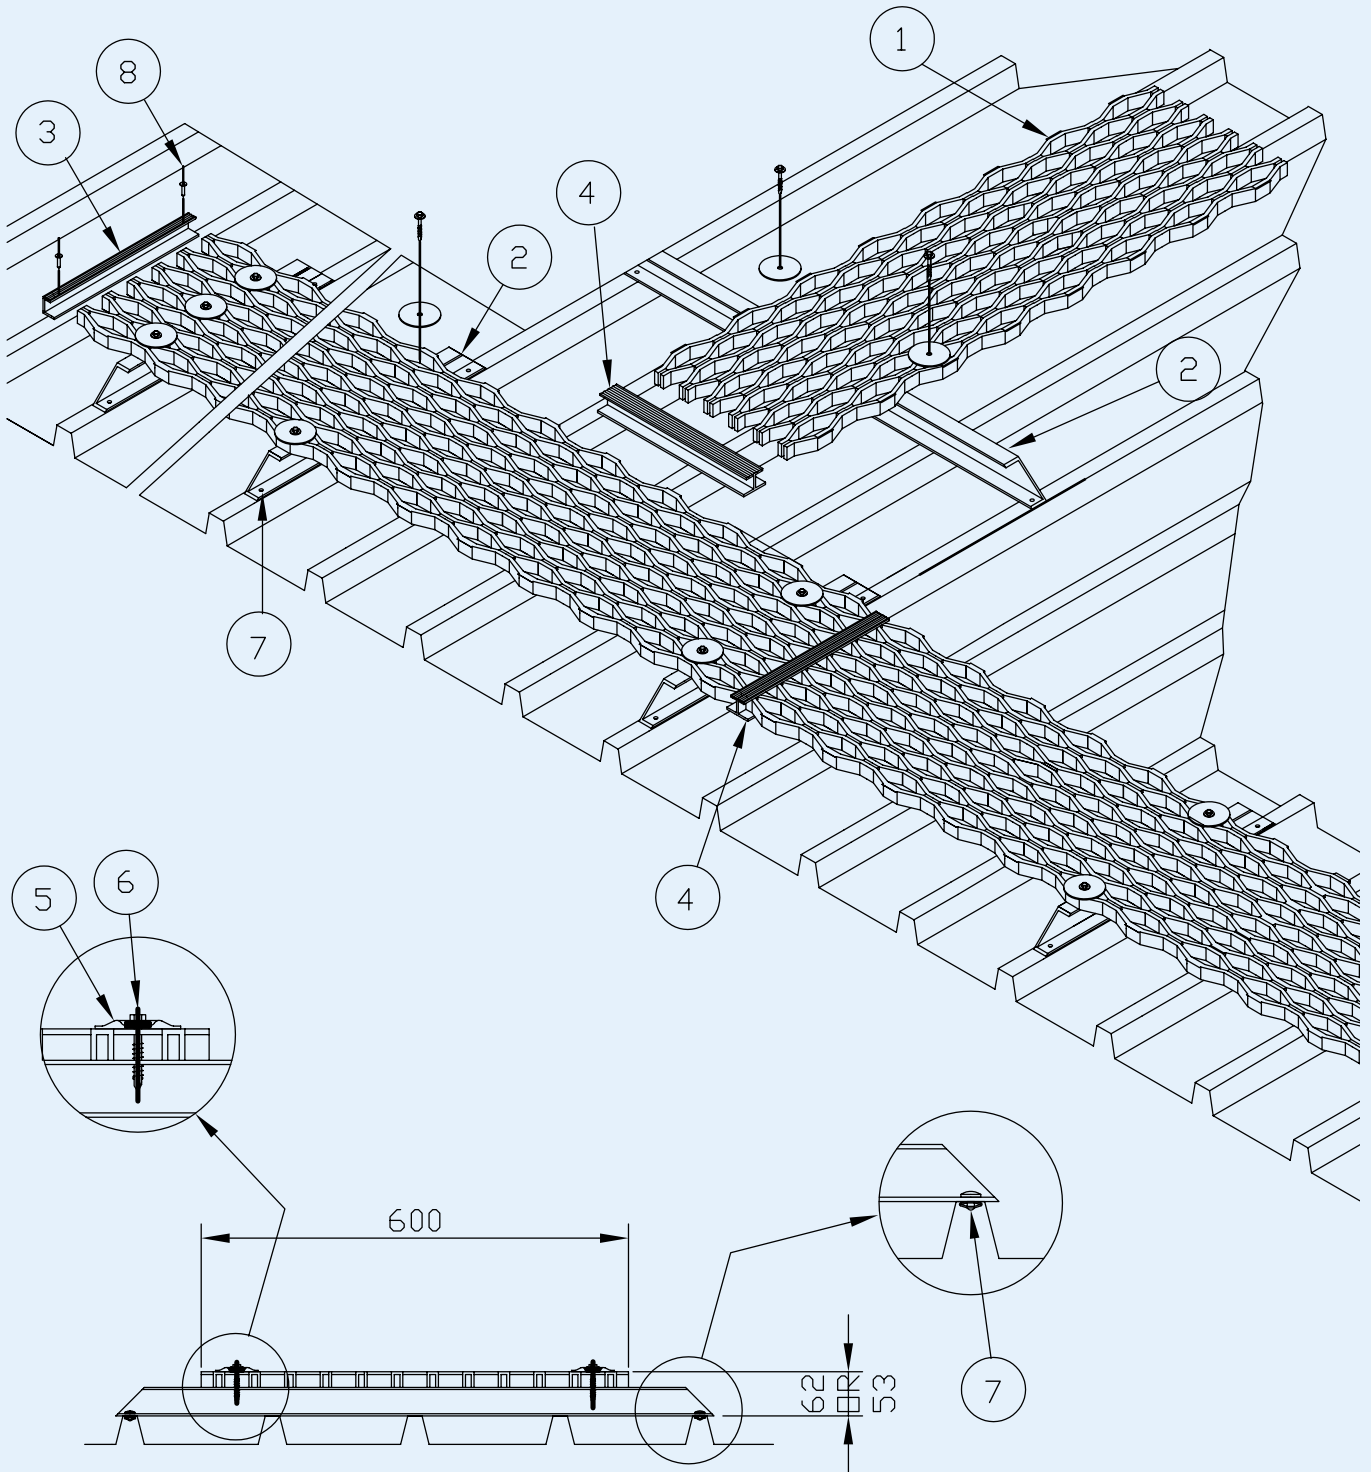

MATERIAL:

- All Ullrich walkway grating and components are supplied in a 'mill finish' unless specified

SPECIF :

- Contact Ullrich to obtain recommended specifications for the various systems required

TYPICAL WALKWAY SECTION

1	WALKWAY GRATING - 6M
2	SUPPORT CHANNEL - 6M
3	END CHANNEL - 4.8M
4	JOINER - 4.8M

5	RETAINING DISC
6	SCREW SELF DRILLING
7	RIVET ALUM. BULB TITE OR WELLNUT
8	RIVET SS

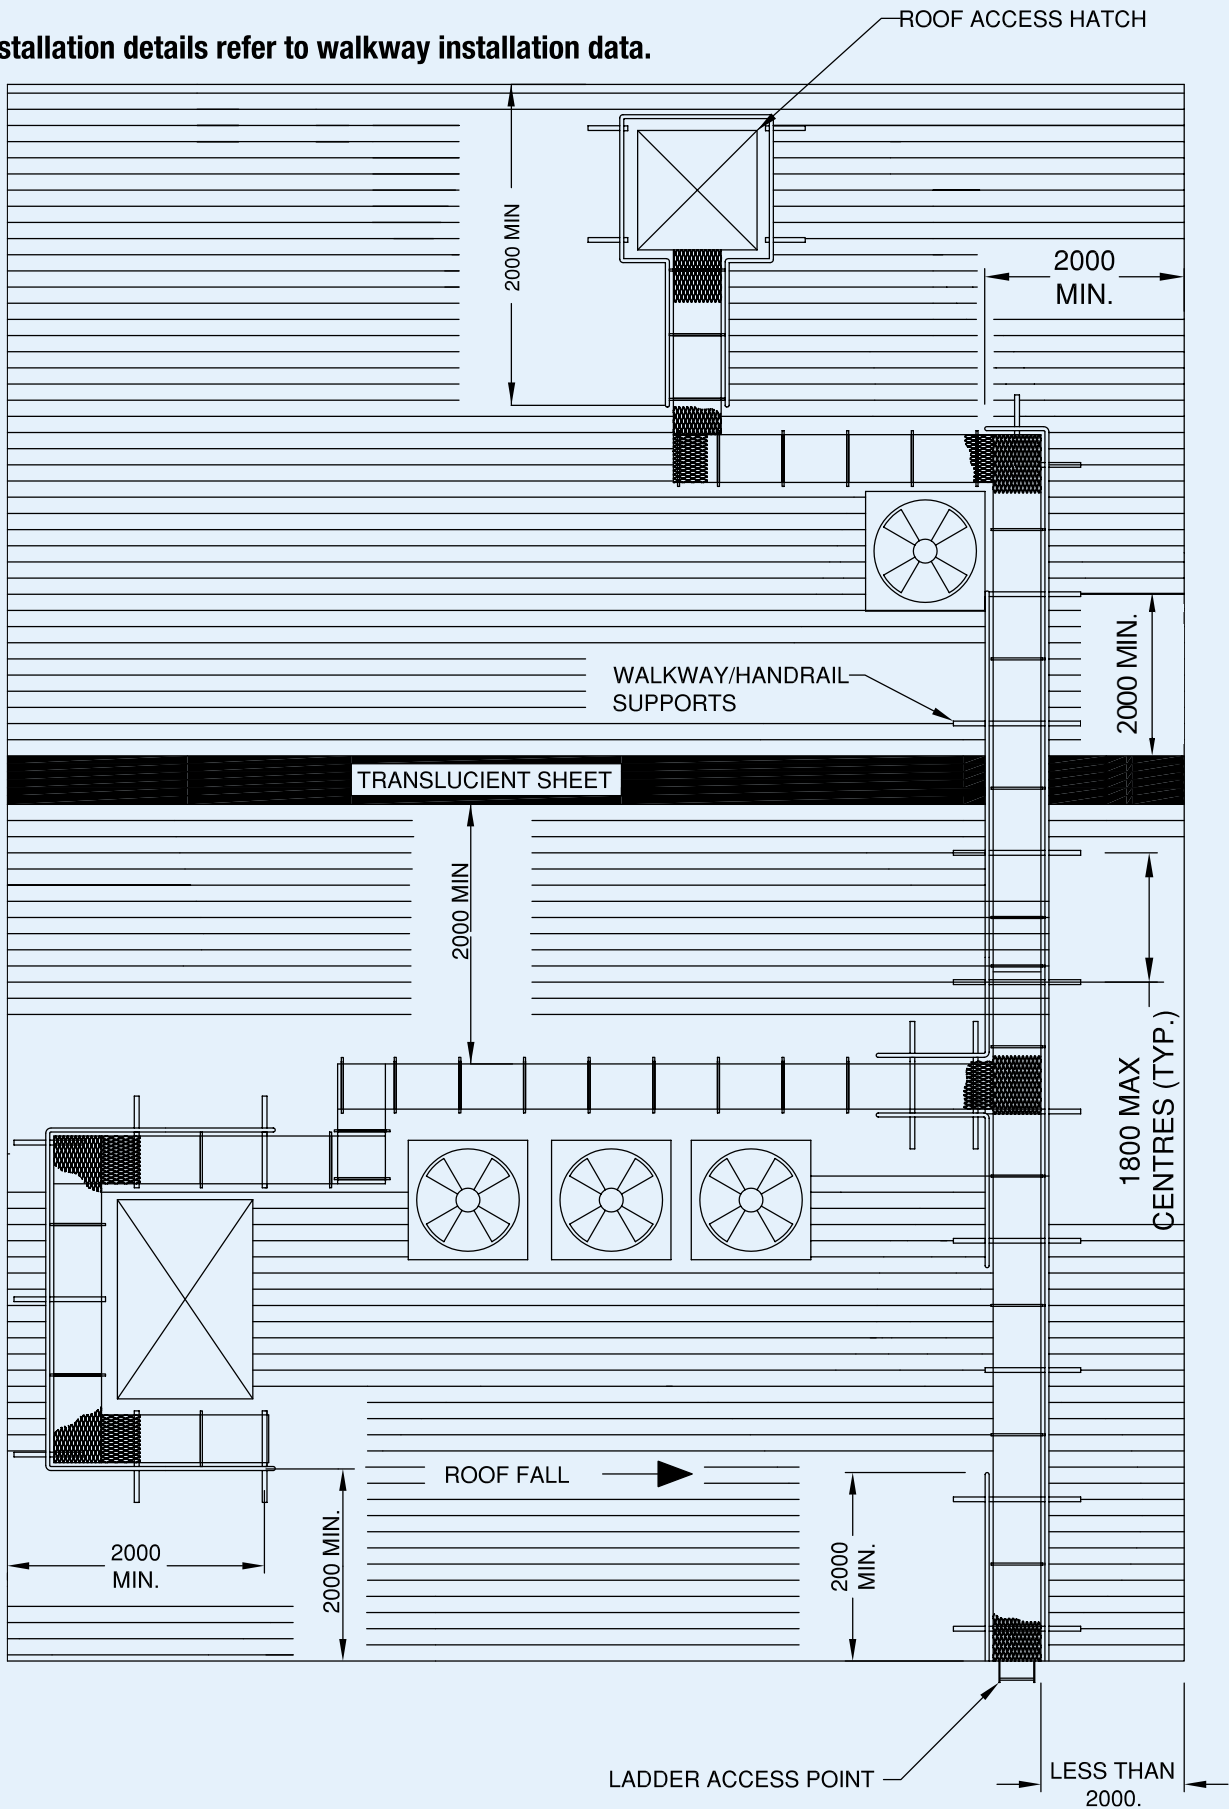

NOTE: Installation Data available upon request

ULLRICH ROOF WALKWAY SYSTEM - TYPICAL LAYOUT

Below is a typical roof walkway installation - shows minimum allowable distances and where handrails will be required.

For Installation details refer to walkway installation data.

INFORMATION: Generally handrails are required if:

ROOF -

- a) The distance to edge of roof is less than 2.0m
- b) Accessing from a ladder: handrails are required to guide person away from roof edge
- c) Any unprotected edge where a person can fall more than 300mm
- d) Walkways fitted to a fibre cement or brittle roof
- e) An access hatch or void is present

STAIRWAYS -

- a) Every stairway shall have at least 1.0m handrail
- b) If the width of stairway exceeds 1.0m handrails are to be provided to both sides

Ref.Source – AS1657-1992 & Workcover – Safe Work on Roofs.

- System suitable for single or double handrails
- Post centres = 1800mm MAX. (recommended 1500mm)
- The above system shows the handrail parallel to the roof with posts at 90° to the sheeting. Vertical handrail posts are also available for greater pitched roofs
- Handrail can be added onto existing roof walkway system at a later stage

1	HANDRAIL ø50 - 6M
2	HANDRAIL BRACKET
3	POST STANDARD - 6M
4	POST STRUT
5	POST CONNECTOR BRACKET
6	HANDRAIL/WW SUPPORT - 6M

7	RIVET ALUM. BULB TITE
8	RIVET SS
9	KNEE RAIL BRACKET
10	KNEE RAIL ø38.1 - 6M
11	EPDM SPACER / SEAL WASHER

NOTE: Installation Data available upon request

Typical installation showing handrail posts 'vertical'

NOTE: Cleats must be fitted when slope is greater than 7°

1	HANDRAIL $\phi 50$ - 6M
2	HANDRAIL BRACKET
3	POST STANDARD - 6M
4	POST STRUT
5	POST CONNECTOR BRACKET

6	HANDRAIL/WW SUPPORT - 6M
7	RIVET ALUM. BULB TITE
8	RIVET SS
9	KNEE RAIL BRACKET
10	KNEE RAIL $\phi 38.1$ - 6M
11	EPDM SPACER / SEAL WASHER
12	WALKWAY SUPPORT ANGLE
13	CLEAT BAR - 4M
