SECURITY DOORS AND WINDOWS

The Ullrich Security Doors and Window System is designed for application to domestic and commercial building to provide an extra barrier against unwanted intrusion, trespass, burglary and home invasion, while allowing unrestricted airflow and vision outdoors.

The system comprises a complete range of extrusions, fittings and accessories ready for custom-fitting to individual specifications and design requirements.

The finished installation is lightweight for ease of use, yet sturdy and secure. Anodised or baked enamel coatings in a range of colours provide an attractive, fashionable finish.

Aluminium-alloy manufacturing materials are specially selected for extra durability, toughness and tamper resistance. Heavy duty 7mm Diamond Pattern grille panels exceed the sheer load test and specification requirements of ANZS2803 and are suitable for inclusion in door framing manufactured and tested to this standard.

“G007” SPECIFICATION

- 7mm Security Mesh (ASNZ 2803)
- 10 year guarantee
- Opening size – 67mm x 84mm
- Cord dimension – 7mm x 5.8mm
- Web thickness – 2mm
- Alloy 6063

ULLRICH INSERT MESH: PRODUCT INFORMATION

COMMERCIAL APPLICATIONS

For doors, windows and partitions in workplaces, storage areas and public buildings, where intrusion of insects is detrimental to comfort and hygiene and where natural airflow is desirable:

- Kitchens and food preparation areas
- Garden restaurants, patio bars and cafés
- Hotel and motel dining and accommodation rooms
- Factory cafeterias
- Hospitals and medical facilities
- Food processing plants and storage areas
- Food retail outlets
- Roll curtains for tent manufacturing (fibreglass mesh)

DOMESTIC APPLICATIONS

All dwelling apertures or partitions where intrusion of insects is detrimental to living comfort and hygiene, and where natural airflow is desirable:

- Main entrances
- Kitchens
- Dining rooms
- Living rooms and bedrooms
- Breeze-ways
- Conservatories
- Summer houses
- Covered decks and patios
- Pergola walls
