

'LIBERTY'

Fully Framed Pivot Door

Semi-Frameless
Pivot Door

For ease of operation the sliding doors are supported by the rollers which are located in the head. This leaves the sill clear of obstructions, thus reducing grime build up and minimises cleaning. Doors can be made to open from left or right subject to bathroom layout.

A range of anodised or powder coated colours is available via our fabricators.

Space Saver

Has a unique system of opening and closing 2 doors which meet at the corner. This enables larger openings in confined spaces.

Three Door Slider

Increases the door opening to 2/3 of the shower width. The doors overlap to form one panel.

Two Door Slider

Every bathroom in this day and age is different, this two door slider maximises the space usage.

Anti Rattle Block.

This system ensures a smooth and easy glide along the open sill.

The head of the shower has ball rollers giving a smooth silent operation whilst the blocks prevent 'clunking' of the sliding door panels. This system has been tested and proved for reliability for over 20 years.

Every shower screen is glazed to comply with the requirements of Australian Standards AS2208 and AS1288.

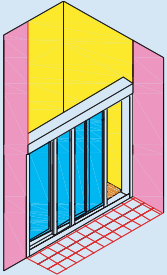

Fabrication drawings are available upon request via our network of branches.

"Liberty" shower screens are designed to enable the designer or installer freedom of choice. "Liberty" can be made to fit most situations.

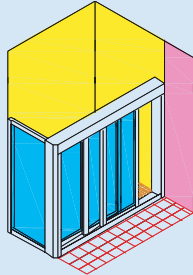

I.E. Between walls, with return panel, corner enclosed and spacesaver.

All with either sliding or pivoting doors.

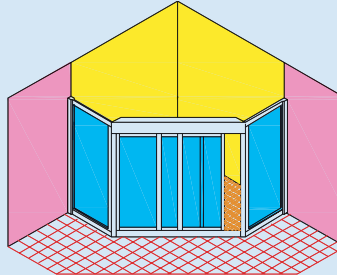

All door frames are fitted with end caps in colours to suit.

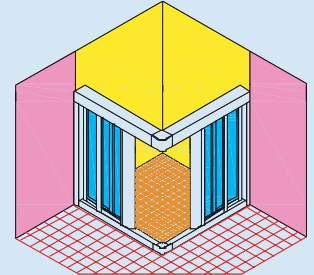

FRONT ONLY

FRONT AND RETURN

CORNER ENCLOSURE

SPACE SAVER

Fully framed pivot door with laminated glass and a full aluminium frame for maximum protection.

Available in clear and obscure glass.

Semi-frameless pivot door, toughened glass providing maximum protection against both thermal and human impact, streamlined good looks and easy cleaning are the features of this great design.

Simple pivot design is suitable for both fully framed and semi frameless doors. The pivot automatically reduces the gap between the door and sill when door is closed.

Fabrication drawings are available upon request via our network of branches.
