New Zealand's
weather conditions
demand a cladding
system that performs
year after year.
That's ULLTRACLAD[®]
from Ulirich Aluminium.

Standard Board

BUILDING?.....

YOU NEED
ULLTRACLAD®
THE RELIABLE
CLADDING
SYSTEM

Air circulates behind the cladding allowing it to breathe and therefore eliminating the risk of your new home leaking and ensuring there is no possibility of rot.

ULLTRACLAD® The aluminium weather board system that breathes

With the advent of the "leaky home syndrome" Ullrich Aluminium decided that there had to be a better way to clad the outside of new homes. When Ullrich Aluminium developed ULLTRACLAD®, an extruded aluminium cladding, special attention was paid to the way that air circulates behind the cladding allowing it to breathe and therefore eliminate the risk of your new home leaking and ensuring there was no possibility of rot.

Ullrich Aluminium's ULLTRACLAD® has been verified by B.R.A.N.Z and complies with E2 for use with or without a cavity (depending on the risk factor) so can be used in all aspects of building, whether it be high rise, the family home or renovation. With an ULLTRACLAD® re-clad of existing older homes the results look like new yet retain the original appeal of the dwelling. With its affordability, good looks and reliability it is fast becoming the recommended choice of architects and builders alike.

The Ullrich Aluminium ULLTRACLAD® mounting system makes for ease of assembly and as it is a complete integrated system with its own flashing and corners it is without the maintenance and problems associated with other forms of cladding. The ease and speed with which ULLTRACLAD® is fitted and the fact that it is prefinished makes for faster construction time and less cost in scaffolding.

ULLTRACLAD® won't crack or warp and comes in six different board profiles. It is available in sixty different powdercoat colours and can be anodised to suit customer requirements. With a massive 25 year warranty ULLTRACLAD® is a wall cladding system for all weather conditions.

Designed and manufactured by New Zealand's aluminium producer, Ullrich Aluminium Co Ltd.
