

CASE STUDY: CLADDING UPGRADE FOR BRANCH

Location: Silverdale, Auckland

Cladding Profile: Shadoline

Our Silverdale branch needed a fresh modern look, the existing blocks were looking dated – what better product to use than our own cladding system...Ultraclad. Because Ultraclad can be powder coated to a range of colours, we chose our own company branding colour "Ullrich Blue".

The result looks like a new building, also with Ultraclad's easy installation method, there was minimum disturbance and the branch remained open during the construction.

Does your building need a new lease of life? **A low maintenance, lightweight Branz approved** makeover?

If so call Ullrich Aluminium today!
