Ulrich Aluminium has over 20 years of experience in Design/Extraction/Distribution of aluminium in Australia, New Zealand and the Pacific Islands. We pride ourselves on our excellent designs, technical advice and after sales service.

**Design**

The Ulrich Aluminium grating has been designed to meet the requirements of Australian Standards AS1657-1992.

**Features**

- Lightweight
- Suitable for corrosive environments
- High resistance to slip
- Easily machined and fabricated
- Readily available via our national distribution outlets

**Uses**

- Walkways on roofs
- Platforms (airport, marine)
- Roof A/C platforms
- Pit grating for Wastewater Treatment Plants
- Star Treads

**Material**

All Ulrich grating and stair tread is manufactured from Aluminium Alloy 6063 T5.

**Specify**

The grating panels shall be fabricated using Ulrich Aluminium grating series (patent) and designed to comply with Australian Standard AS1657-1992. Fabricate/install according to Ulrich recommendation.

**Panel Loading**

The diagrams below are a graphical interpretation of panel loading shown in the safe load tables.
